CPN marketing plan: final deck outline

10-minute slot: 12 core slides + 6 backup · speech 8:30 + 5 handovers x 0:10 + 0:40 spare · Q&A follows (5 to 10 min)

Updated 29 Oct 2026

Run of show

600 s = 510 s speech + 50 s handovers + 40 s spare

handover 0:10 (x5) · speaker block Spkr 1 to Spkr 6 (names assigned by the team)

The 12 core slides

headline = the sentence at the top of each slide (S1 has none; its row shows a one-line summary)

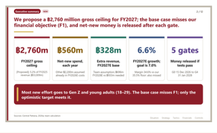

S1 Title

Title

Marketing plan for Central Pattana: what we propose for FY2027, what it costs and how we will control it.

0:10 · Spkr 1 · 21 words

NEW · Title slide

S2 The plan in five numbers

Executive summary

We propose a ฿2,760 million gross ceiling for FY2027; the base case misses our financial objective (F1), and net-new money is released after each gate.

0:45 · Spkr 1 · 76 words

NEW · 5 key numbers

S3 Situation recap

2.2, 2.6 · Situation analysis

CPN's reach of 44 shopping centres at end-2025 and about 510 million visits a year is strong, but three issues need attention.

0:35 · Spkr 2 · 67 words

RECAP · SWOT + 3 issues

S4 Strategy recap

3.2–3.5 · Marketing strategy

Six proposed objectives and four target tiers give Gen Z and young adults (ages 18–29) the largest share of new effort, under a Center of Life position.

0:35 · Spkr 2 · 71 words

RECAP · 3 columns

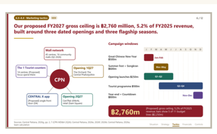

S5 Product + pricing

4.1–4.2 · Marketing tactics

Rental and services is 82.5% of FY2025 total revenue (team calculation), but the documents we reviewed give no CPN rents, so we propose rules, not rent levels.

0:55 · Spkr 3 · 104 words

NEW · Table + figures

S6 Distribution + promotion

4.3–4.4 · Marketing tactics

Our proposed FY2027 gross ceiling is ฿2,760 million, 5.2% of FY2025 revenue, built around three dated openings and three flagship seasons.

0:55 · Spkr 3 · 103 words

NEW · Channels + calendar

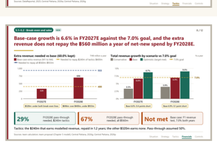

S7 Research and indicators

4.5, 6.1 · Research and KPIs

We propose to measure Gen Z and young adults by survey (ages 20–29) and member data (18–29), with baselines by 31 March 2027 to set targets against our data.

0:35 · Spkr 4 · 75 words

NEW · Research + KPIs

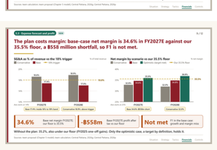

S8 Break-even + sales forecast

5.1–5.2 · Break-even and sales

Base-case growth is 6.6% in FY2027E against the 7.0% goal, and the extra revenue does not repay the ฿560 million a year of net-new spend by FY2028E.

0:55 · Spkr 4 · 103 words

NEW · Charts

S9 Expense forecast + profit

5.3 · Expense forecast and profit

The plan costs margin: base-case net margin is 34.6% in FY2027E against our 35.5% floor, a ฿558 million shortfall, so F1 is not met.

0:55 · Spkr 5 · 103 words

NEW · Charts

S10 Implementation + organization

6.1–6.2 · Roadmap and organization

We propose to release money in five gates from 15 December 2026, inside a ฿560 million net-new cap; a failed gate holds or cuts the next release.

0:50 · Spkr 5 · 103 words

NEW · Timeline + roles

S11 Contingency planning

6.3 · Contingency planning

If 2020 repeated, CPN's own 51.6% core profit fall would cut FY2027E profit by ฿10.5bn, more than marketing can absorb, so credit is the constraint to watch.

0:50 · Spkr 6 · 103 words

NEW · Risk map

S12 Three takeaways

Conclusion · Q&A

We propose ฿560 million of net-new marketing; the base case misses F1 (6.6% growth, 34.6% margin), and gates and a response ladder control the spend.

0:30 · Spkr 6 · 55 words

NEW · 3 takeaways

Backup slides (not presented; ready for the Q&A)

B1 References

The Chapters 4 to 6 reference list has 76 entries, mostly company disclosures (40) and news items (17); letter suffixes follow first use, not strict APA order.

B2 Situation backup

The backup shows the SWOT detail, five named rivals plus Mega Bangna, and the team's BCG and nine-box views; malls rank first and offices sit at Low x Low.

B3 Tactics backup

The proposed FY2027 ceilings total ฿2,760 million over 11 lines, 5.2% of FY2025 revenue, a team proposal and not CPN guidance.

B4 Model assumptions

In FY2027E the base case misses F1 (growth 6.6% against 7.0%; margin 34.6% against our 35.5% floor); only the optimistic case meets it.

B5 Full risk register

All ten risks in Table 6.6 have a likelihood, an impact, a numeric trigger and a response; four are rated High impact (risks 2, 6, 7 and 10).

B6 Q&A cards

We answer the 13 likely questions plainly, with a suggested speaker for each: the base case misses F1 and the extra revenue is our assumption.

Build checklist

- Tap a slide row above, or use the bookmarks, to jump to its page. Each page has the comp, the speaker notes and the slide text to copy; page 2 is the build key (frame, colours, type and chart rules).
- Canvas 1920 x 1080; palette maroon #8C1D28 and gold #C9A227 as in the 7 Sep deck, with that deck's fonts (the comps use Segoe UI as a stand-in); sources line at the foot of every slide except S1.
- Headlines are the full sentences shown. Keep caveats off the main slides; the only one (The Central Phaholyothin date) sits in the B2 footnote.
- Build the charts on S8 and S9 as native, editable charts; their data, axes and colours are under 'Text on the slide' on each page.
- Footer navigation (Situation, Strategy, Tactics, Financials, Controls) on S2 to S12; the current section is highlighted on S3 to S11 only.
- Paste the speaker notes into each slide's notes: 984 words written, about 1,119 spoken with numbers read aloud, which is 516 s at 130 words a minute against the 510 s budget. Backup pages carry short notes; B6 lists owners and first answers.
- Numbers and sources were checked against the report and the corrections log on 29 Oct 2026, and the report was aligned with the deck. B6 sources outside Chapters 4 to 6 (Central Retail, CPN 9 Apr 2026, S&P Yearbook, CPN IR page) are in the Sections 2–3 list.
- Locked corrections: 23 provinces; Central Retail's loyalty ecosystem has 23M members in Thailand (we read it as The 1); 50% cut by 2034 vs 2024; Phaholyothin 1Q27; base case misses F1.

Build key: frame, colours, type and chart rules

Canvas and frame

Canvas 1920 x 1080 px (16:9). Maroon bar down the left edge, x 0 to 26, full height. Content margins x 80 to 1840.

Top row (y 30 to 74): section chip (pill, 44 px high, white bold 24 px on the section colour) and status chip (NEW or RECAP: 36 px pill, bold 18 px in the section colour on a 14% tint). Page counter 'n / 12' right-aligned at x 1840 (24 px semibold, muted).

Headline: bold 46 px maroon, up to two lines (shrinks to 30 px only if needed), box x 80 to 1840, y 94 to 232. Gold rule 180 x 6 px at y 240.

Body area y 268 to 982. Footer: rule at y 1000 (#D8D2C6, 2 px); sources line 20 px muted at the left (width about 1180); footer navigation right-aligned at y 1030 in 20 px, the current section bold with a 4 px underline in its colour.

The title slide (S1) has no frame: maroon panel x 0 to 780 with the title (white bold), subtitle (light gold) and a gold rule; team, supervisor and course on white from x 880.

Colours (name, hex, use)

maroon #8C1D28 Frame bar, headlines, primary colour; Open and Close sections

gold #C9A227 Gold rule under the headline, highlights, release chip outline

golddark #855C00 Tactics section colour; text on pale gold

slate #2F4B7C Situation and Strategy section colour

teal #1B6B5A Financials section colour; positive callouts

purple #5B3F8C Controls section colour

gray #8A857B Backup slides; neutral chart series

warn #B4531A Warning and negative callouts

ink #1E1E1E Body text

muted #5A554C Secondary text, sources line, unit labels

line #D8D2C6 Rules and card outlines

faint #F1EDE5 Header bands in timelines and calendars

edge #BDB7AA Image and table outlines

mid #9A9385 Connector lines

tint #E8C85A Gold on maroon backgrounds; handover blocks in the run of show

tint #F0D78C Light gold text on maroon

tint #FFF8E1 Pale-yellow annotation chips and release chips (gold outline)

tint #F6F2EA Zebra rows in tables

tint #E6E1D7 Chart gridlines (zero line is #5A554C)

Section colours and accent order

S1, S2, S12 maroon; S3 and S4 slate; S5, S6, S7 gold-dark; S8 and S9 teal; S10 and S11 purple; backup pages grey.

Cards, tiles and bars on S2, S5, S6, S7 and S12 rotate through: maroon, gold-dark, teal, slate, purple. Card fill is the accent colour at 93% tint towards white with a 2 px outline in the accent colour; KPI tiles are white with a 14 px accent bar on top. S3: SWOT cards teal (Strengths), orange (Weaknesses), slate (Opportunities), maroon (Threats). S4: three columns with maroon, gold-dark and slate header bands.

Type and shapes

The comps use Segoe UI as a stand-in; use the 7 Sep deck's fonts. Whatever font you pick must render the baht sign (U+0E3F), the superscript 2 and the en dash.

Sizes on the 1920 canvas: headline 46 bold; big KPI values 88 bold (one size across a row of tiles, shrunk to fit the longest); tile labels 32 bold; notes under tiles 25; bullets 26 to 31; table text 19 to 30 on core slides (14 to 17 on reference pages) with a bold header row; card titles 28 to 38 bold; chart labels 19 to 22; sources and navigation 20. Smallest body text on core slides is 18.

Corner radii 14 to 20 px on cards, pills fully rounded; outlines 2 px (3 px on highlighted boxes).

Charts (S8, S9)

Build as native, editable charts. Value above each column; where a value would sit on a dashed reference line it goes inside the column top in white. Reference lines are dashed, full plot width, with the value at the right end in the line colour (gold text uses gold-dark #855C00).

Category notes are pale-yellow chips under the category label. When an axis does not start at zero (S9) the note 'Axis starts at X%' sits under the axis at the left. Series order and colours are listed in each slide's text block.

Labels used on slides

[Proposed] marks team proposals; 'team assumption', 'team calculation', 'team assessment' mark our own figures; 'per CPN' marks figures reported by CPN. NEW means built for the final deck; RECAP means reworked from the 7 Sep deck.

Back to outline

We propose a ฿2,760 million gross ceiling for FY2027; the base case misses our financial objective (F1), and net-new money is released after each gate.

฿2,760m

FY2027 gross ceiling

[Proposed]; 5.2% of FY2025 revenue (฿53,009m)

฿560m

Net-new spend, each year

Other ฿2,200m assumed already in FY2026E costs

฿328m

Extra revenue, FY2027E base

Team assumption; ฿696m FY2028E vs ฿933m needed

6.6%

FY2027E growth; goal is 7.0%

Margin 34.6% vs our 35.5% floor: also missed

5 gates

Money released if tests pass

G0 15 Dec 2026 to G4 31 Jan 2028

Most new effort goes to Gen Z and young adults (18–29). The base case misses F1; only the optimistic target meets it.

Sources: Central Pattana, 2026a; team calculation

S2 The plan in five numbers

0:45 · Spkr 1 · 5 key numbers · NEW

Say · 76 words (99 spoken) · 0:45 · Spkr 1

One: a proposed gross ceiling of 2,760 million baht. Two: net-new spend, 560 million a year. Three: our base case adds 328 million, then 696 million; repaying 560 million a year needs 933 million. Four: growth of 6.6 percent against 7.0 and margin of 34.6 against our 35.5 floor miss our objective, F1. Only the optimistic case, a target by definition, meets it. Five: money is released after each gate. Our second speaker covers the situation.

Back to outline

CPN's reach of 44 shopping centres at end-2025 and about 510 million visits a year is strong, but three issues need attention.

S Strengths

- 44 centres (FY2025), 16 community malls, 23 provinces
- About 510 million visits a year; The 1 loyalty data

W Weaknesses

- Relies on physical retail (team assessment)
- Costly to keep a premium experience (team assessment)

O Opportunities

- Tourists beyond China: South Asia and long-haul
- Net Zero 2050 as a point of difference

T Threats

- Rivals: Siam Piwat, The Mall Group
- Household debt 85.9% of GDP (Q1 2026); credit is tight

Critical issues for the plan

1 E-commerce takes retail share

Online share of Thai retail sales: 20.45% to 23.50%, 2022 to 2024

2 Tourism depends on China

Chinese arrivals fell 33.55% y/y in 2025, rose 16.05% in Jan–Aug 2026

3 Capital-heavy mega-projects

The Central Phaholyothin alone is a ฿21 billion investment

Sources: Central Pattana, 2026a, 2026b, 2026c; Central Retail Corporation, 2025; Nation Thailand, 2025a, 2026g, 2026l; Government Public Relations Department, 2026

S3 Situation recap

0:35 · Spkr 2 · SWOT + 3 issues · RECAP

Say · 67 words (76 spoken) · 0:35 · Spkr 2

CPN's reach is strong: it ended 2025 with 44 shopping centres and 16 community malls across 23 provinces. Weaknesses, in our assessment: reliance on physical retail and the cost of a premium experience. Three issues need attention: e-commerce, tourism that leans on China, and heavy investment in mega-projects. Chinese arrivals fell 33.55 percent year on year in 2025 and rose 16.05 percent in January to August 2026.

Back to outline

Six proposed objectives and four target tiers give Gen Z and young adults (ages 18–29) the largest share of new effort, under a Center of Life position.

Objectives [Proposed]

6

objectives: M1–M5 and F1

- M1 Gen Z and young adults visit more often
- M2 More tourists beyond China; M3 online-to-offline (O2O) conversion
- M4 The 1 BIZ tenant partners; M5 sustainability as an asset
- F1 Growth of 7.0% to 9.0% and a margin floor of 35.5% (team figures)

Target markets

4

target tiers, in priority order

- Primary: urban middle- to upper-income adults and families
- Secondary: Gen Z, young adults (ages 18–29); largest new-effort share
- Tertiary: domestic and international tourists
- B2B: global and local retail brands seeking prime sites

Positioning

- CPN's CFO calls CPN Thailand's leading place maker
- Most Admired Company: No. 1 in shopping centres, 3 years running
- Team positioning: Center of Life live-work-shop-stay developer
- Backed by data personalisation and sustainability leadership

Sources: Central Pattana, 2025d; ThaiPR.net, 2026; team proposal; team calculation

S4 Strategy recap

0:35 · Spkr 2 · 3 columns · RECAP

Say · 71 words (77 spoken) · 0:35 · Spkr 2

Six proposed objectives. Marketing: more Gen Z visits, more tourists beyond China, online-to-offline conversion, The 1 BIZ partnerships, and sustainability as an asset. Financial: our figures are 7.0 to 9.0 percent growth and a 35.5 percent margin floor. Four target tiers rank our markets. Gen Z and young adults get the largest share of new effort. We position CPN as the Center of Life developer. Our third speaker takes the tactics.

8.9%
Voucher rate, 400 per 4,500 baht (team calculation)

Sources: Central Pattana Investor Relations, 2026, p. 15; Cushman & Wakefield, 2026, p. 1; Central Pattana, 2026a, 2026j; team calculation; TRIS Rating, 2026

S5 Product + pricing

0:55 · Spkr 3 · Table + figures · NEW

Say · 104 words (121 spoken) · 0:55 · Spkr 3

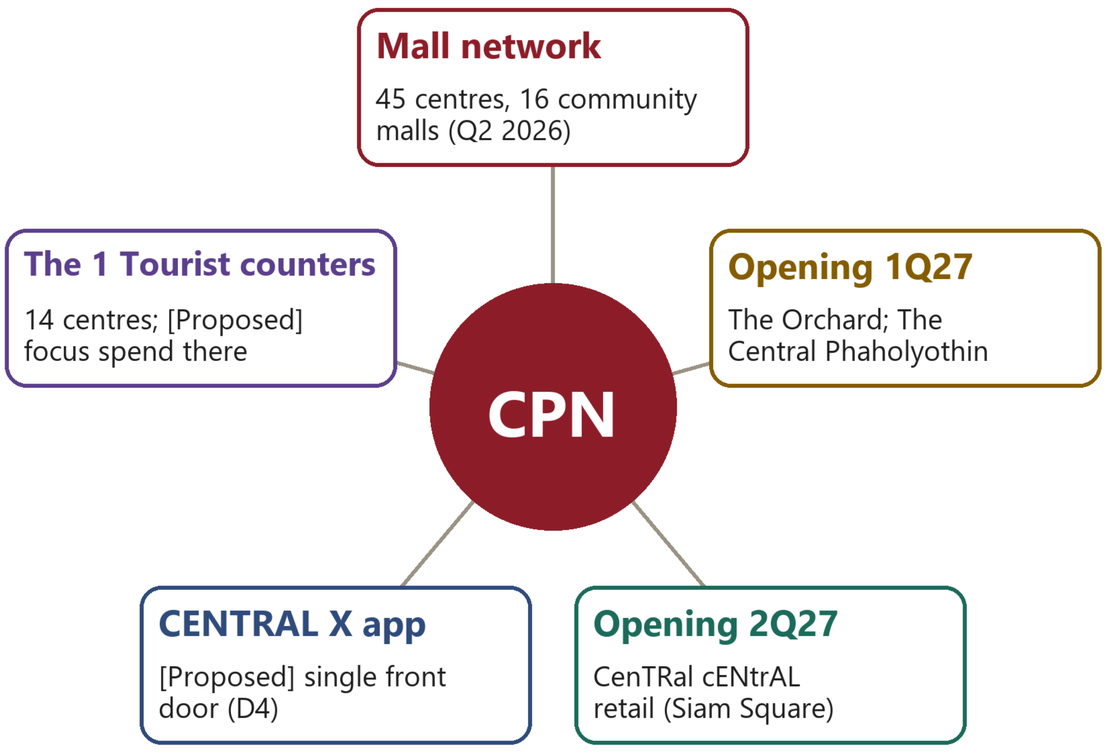

Four of our proposed tactics: a Gen Z format zone, LEAD Year 9 favouring Gen Z categories, a renewal rule keeping rent rises inside TRIS Rating's band, and Gen Z event access through CENTRAL X receipts. State Your Style gave a 400 baht voucher per 4,500 baht spent, 8.9 percent by our calculation; vouchers are capped. Rental and services was 43,721 million baht in 2025, 82.5 percent of total revenue by our calculation. In the documents we reviewed CPN publishes no rents, so we propose no rent levels. The 3,769 baht is a Bangkok prime asking rent per square metre a month, not CPN's.

Back to outline

Our proposed FY2027 gross ceiling is ฿2,760 million, 5.2% of FY2025 revenue, built around three dated openings and three flagship seasons.

Campaign windows

฿2,760m [Proposed] gross ceiling, 5.2% of FY2025 revenue; bars show 5 of 11 budget lines (฿2,250m)

Sources: Central Pattana, 2026g, pp. 2, 7 (CPN MD&A 2Q26); Central Pattana, 2026e, 2026f, 2026k; Central Pattana, 2026a; team calculation

S6 Distribution + promotion

0:55 · Spkr 3 · Channels + calendar · NEW

Say · 103 words (121 spoken) · 0:55 · Spkr 3

By Q2 2026, CPN had 45 shopping centres and 16 community malls. Three openings are dated for 2027: The Orchard and The Central Phaholyothin in the first quarter, CenTRal cENtrAL retail in the second. We propose CENTRAL X as the single app front door, and tourist spend focused where The 1 Tourist counters are. Promotion has three flagship seasons: Great Chinese New Year gets 500 million baht, Summer Fest 600 million, and the year-end season 800 million. Our proposed FY2027 gross ceiling is 2,760 million baht. By our calculation, that is 5.2 percent of FY2025 revenue. Our fourth speaker takes research and indicators.

Back to outline

We propose to measure Gen Z and young adults by survey (ages 20–29) and member data (18–29), with baselines by 31 March 2027 to set targets against our data.

How we learn

S2 The 1 cohort analytics — Jan–Feb; quarterly
Active members, visits and spend per member by age band

S4 Intercept survey — Jan–Mar; waves Q2–Q4
1,500 respondents aged 20+, 300 per centre, weighted to footfall

S5 Tourist research — Baseline Q1; repeat Q3
Tourist registrations, partner spend, exit surveys

S6 Sustainability tracker — Q1 baseline; quarterly
Unaided sustainability association, 400 per segment

What we track

M1
K1 20–29 share of visitors aged 20+
Baseline
Set by 31 Mar 2027
Target [Proposed]
+4 points by Q4 wave

M2
K3 India/Gulf/Europe registrants
Baseline
Set by 31 Mar 2027
Target [Proposed]
+5 points by Q4

M3
K4 O2O conversion
Baseline
Set by 31 Mar 2027
Target [Proposed]
+10% relative by Q4

F1
K13 Average occupancy
Baseline
91% in 2Q26
Target [Proposed]
No quarter below 90%

Sources: DataReportal, 2025; Central Pattana, 2026a; Central Pattana, 2026g

S7 Research and indicators

0:35 · Spkr 4 · Research + KPIs · NEW

Say · 75 words (78 spoken) · 0:35 · Spkr 4

We define Gen Z and young adults as ages 18 to 29. Our survey reaches only people aged 20 and over, the age of majority, so it measures 20 to 29; member data cover active members 18 to 29. We found no CPN age split of visits, so we set a baseline by 31 March 2027. The only published comparator, 14.7 percent for ages 13 to 24, is another band. Four indicators track proposed targets.

Back to outline

5.1–5.2 · Break-even and sales NEW

Base-case growth is 6.6% in FY2027E against the 7.0% goal, and the extra revenue does not repay the ฿560 million a year of net-new spend by FY2028E.

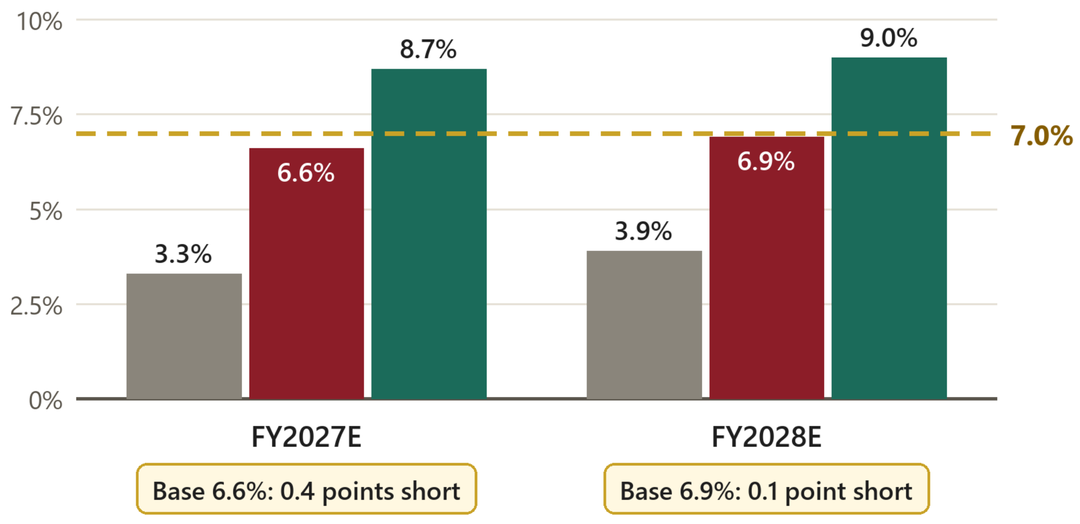

Extra revenue: needed vs base (60.0% kept)

THB million a year

Total revenue growth by scenario vs 7.0% goal

% a year

29% FY2028E pass-through needed, ฿240m tactics

67% FY2028E pass-through needed, all ฿560m

Not met Base case: F1 revenue test, 7.0% both years

Tactics: the ฿240m that earns modelled revenue, repaid in 1.2 years; the other ฿320m earns none. Pass-through assumed 50%.

Sources: team calculation; team proposal (Chapter 5 model); Central Pattana, 2026g; Central Pattana, 2026p

S8 Break-even + sales forecast

0:55 · Spkr 4 · Charts · NEW

Say · 103 words (121 spoken) · 0:55 · Spkr 4

We add 560 million baht a year of net-new marketing. Only 60 percent of extra revenue is kept, so we need 933 million more a year. The tactics are the 240 million that earns modelled revenue; they need 400 million and repay in 1.2 years. The full 560 million a year does not. In 2028 it needs 67 percent of any gain to reach CPN's revenue; we assumed 50. The tactics need only 29 percent. Base-case growth is 6.6 percent in 2027 and 6.9 in 2028, short of 7. Only the optimistic case passes, by definition. Our fifth speaker covers expenses and profit.

S9 Expense forecast + profit

0:55 · Spkr 5 · Charts · NEW

Say · 103 words (121 spoken) · 0:55 · Spkr 5

We assume CPN pays all 560 million baht of net-new marketing. That lifts administrative costs to 17.4 percent of revenue in 2027. The conservative case crosses our 18 percent trigger. The base case margin falls to 34.6 percent, against our 35.5 percent floor: 558 million short. Without the plan the margin would be 35.2 percent, also below our floor, so the plan costs about 0.7 points. Our floor is FY2025's margin, which includes 3.2 points of one-off Rama 2 gains. Only the optimistic case holds our floor, and it is a target by definition. So the base case does not meet objective F1.

Say · 103 words (110 spoken) · 0:50 · Spkr 5

We propose releasing money in five gates from 15 December 2026. Net-new spend is capped at 560 million baht. A failed gate holds or cuts the next release. Gates zero and one test readiness: set-up and baseline. From gate two, we test results. Gate zero releases the first 155 million baht for Gen Z, tourist and CENTRAL X programmes. Gates one and two release the second half; gate three, the year-end season. Gate four, on 31 January 2028, decides the 2028 repeat. A proposed Plan Office under CPN's chief marketing officer owns the dashboard and the gates. Our sixth speaker covers the risks.

Back to outline

If 2020 repeated, CPN's own 51.6% core profit fall would cut FY2027E profit by ฿10.5bn, more than marketing can absorb, so credit is the constraint to watch.

Risk map (team judgement)

1 E-commerce, social-commerce gain
2 Household debt, slowdown
3 Tourism volatility, China
4 Bangkok saturation, tenant power
5 Overseas execution
6 PDPA and data privacy
7 Sustainability-claim exposure
8 Capex and execution overrun
9 Dependence on one-off gains
10 Gen Z disengagement (thesis)

Three risks to watch

Risk	Trigger [Proposed]	Response [Proposed]
2. Household debt, slowdown	Debt over 88% of GDP; 2027 growth forecast under 1.5%	Amber freezes, Red suspends lines; capped vouchers (R4)
10. Gen Z disengagement (thesis)	Gen Z visits per active member below +5% at G3	Format zones (P1); move money to the best-performing format
6. PDPA and data privacy	Confirmed breach complaint or leak; no report in 72 hours	S1 set-up; aggregated extracts only; S4 survey ages 20+ only

Response ladder [Proposed]

Amber freezes some spending
Red suspends lines, trims flagship seasons 20%
Crisis suspends most lines, tenant relief

Worst cases and credit sensitivity

TRIS Rating (AA+/Stable) flags sustained debt to EBITDA over 4 times. That is a sensitivity, not a limit. The ratio was 3.4 in 2025.

-51.6%
2020 replay, year 1: FY2027E profit

-23.6%
Team estimate, severe recession

฿4.6bn
EBITDA headroom to 4x, team calculation

Sources: TRIS Rating, 2026; Central Pattana, 2021, pp. 161, 166; Central Pattana, 2022, pp. 169, 176; team calculation

S11 Contingency planning

0:50 · Spkr 6 · Risk map · NEW

Say · 103 words (108 spoken) · 0:50 · Spkr 6

The ratings are our judgement. Only household debt is rated high on both likelihood and impact. In our assessment, Gen Z disengagement is our biggest exposure. Our thesis rests on Gen Z, so gate three tests it. Our response is a three-step ladder. Amber freezes some spending. Red suspends lines and trims the flagship seasons by 20 percent. Crisis suspends most lines and runs tenant relief. A closure like 2020 would trigger Crisis. CPN's own core profit fell 51.6 percent then; the same fall on our base is 10.5 billion baht. Marketing cuts cannot absorb that, so credit is the constraint we watch.

Back to outline

We propose ฿560 million of net-new marketing; the base case misses F1 (6.6% growth, 34.6% margin), and gates and a response ladder control the spend.

1

Proposal and cost

[Proposed] Six objectives, led by Gen Z: ฿2,760m gross ceiling; ฿560m net-new if ฿2,200m is already in costs.

2

What it returns

Base case misses F1 (6.6%, 34.6%); ฿560m a year is not repaid by FY2028E. Only the optimistic target meets F1.

3

How it is controlled

[Proposed] Five gates, a Plan Office and an Amber, Red, Crisis ladder that freezes, trims or suspends spend.

Thank you. We welcome your questions. Q&A

Sources: team calculation (Tables 5.4, 5.8, 5.9, 5.11); team proposal (Tables 6.2, 6.7)

Back to outline

The Chapters 4 to 6 reference list has 76 entries, mostly company disclosures (40) and news items (17); letter suffixes follow first use, not strict APA order.

76 entries in the Chapters 4 to 6 list

40 from CPN and CPN Investor Relations

17 news and media

12 undated pages (n.d.)

Entries by type (team count)

Type	Entries	Key sources
CPN and CPN Investor Relations	40	MD&A 2Q26 (2026g); MD&A FY2025 (2026p); One Report 2025
Central Group and The 1	7	Central Group, 2026; The1 Central Limited, n.d.-a
Official and legal texts	4	Bank of Thailand, 2026; Personal Data Protection Act, B.E. 2562
Advisers, raters and research firms	8	TRIS Rating, 2026; Cushman & Wakefield, 2026; JLL, 2026
News and media	17	Nation Thailand (12 entries); The Thaiger; The Nation
Total	76	

How the keys work

- A key is author plus year; a letter follows when one author has several items in a year (2026a, 2026b).
- Letters follow first citation, a team convention that differs from the title order strict APA 7 requires.
- Keys 2025a and 2026b are kept from Sections 2–3; their releases are dated 30 Oct 2024 and 8 Oct 2025.
- Undated pages use n.d. with a letter; 14 entries are marked Retrieved because the pages change over time.
- One Report 2025 pages are the printed ones; the PDF file runs four to six pages ahead.
- The 2020 and 2021 annual report entries cite PDF pages.

How the counts were made

The counts are the team's tally, by author, of the 76 entries in the Chapters 4 to 6 reference list. Press releases carried on a wire service are counted under their author, Central Pattana. Sections 2–3 keep their own reference list, so sources cited only there (for example Inside Retail Asia, 2026, and the Central Retail, S&P Yearbook and April 2026 CPN releases that B6 cites) are not counted here.

Back to outline

The backup shows the SWOT detail, five named rivals plus Mega Bangna, and the team's BCG and nine-box views; malls rank first and offices sit at Low x Low.

SWOT detail (Section 2.2)

Strengths S
Center of Life brand; 44 centres (FY2025; 45 by Q2 2026), 16 community malls, 23 provinces; about 510 million visits a year; The 1 data; events.

Weaknesses (team observations, not cited) W
Reliance on physical retail; cost of a premium experience; uneven needs by location; scale versus agility; high expectations.

Opportunities O
Tourism beyond China; experience economy; The 1 personalisation; Net Zero by 2050 and the sustainability-linked bond; mixed use; Thai SMEs; creators.

Threats T
E-commerce, social commerce; Siam Piwat, The Mall Group; household debt 85.9% of GDP (Q1 2026); China arrivals -33.55% in 2025, +16.05% Jan–Aug 2026.

Five rivals, plus Mega Bangna (CPN-linked)

Competitor	Positioning	Note
Siam Piwat	Ultra-premium and luxury; tourist and Gen Z focus	About 70% of luxury spend, single-source estimate
The Mall Group	Upper-middle to premium; entertainment-anchored	Private; building The Bangkok Mall
Seacon Development	Family and mass market; upgrading to a more affluent catchment	Single-metro focus, eastern Bangkok
Terminal 21 (L&H Property)	Experiential, tourist and youth focus	Small and private; competes on novelty
Index Living Mall	Furniture and home category killer	About 35 branches; often a tenant in CPN malls
Mega Bangna	Ikano Centres with Siam Future Development	Siam Future Development is a CPN subsidiary

BCG and nine-box (team assessment)

Segment	BCG quadrant	Nine-box: attractiveness x strength	Action
Retail malls	Star	High x High	Invest / Grow
Hotels	Question Mark	High x Low	Selectivity
Residential	Question Mark	Medium x Medium	Selectivity
Offices	Cash Cow (modest)	Low x Low (bottom-right)	Harvest / Divest

Reading the two views

- Both are portfolio tools (which business line to fund), so they sit in backup, not in the core deck.
- Both are team assessments, not CPN statements.
- Malls are the only Star and the only High x High cell; hotels and residential sit in the Selectivity band.
- Offices sit at Low x Low (bottom-right): a stable earnings line and the lowest capital priority of the four.

Prime retail market, Q3 2026

Central Retail District, prime: average asking rent ฿3,769 per sq m a month, stable on Q2; vacancy 3.63%, down from 3.98% in Q2; rental growth 1.40% y/y. These are market figures, not CPN rents.

Footnote: The Central Phaholyothin date

CPN's October 2025 release targeted Q4 2026 and the One Report (p. 30) lists December 2026. The 2Q26 MD&A (p. 7) lists "The Central" at 1Q27 with about 100,000 sq m, which the team reads as The Central Phaholyothin. Cushman & Wakefield's Q3 2026 report (p. 2) still lists "The Central" (152,000 sq m) for Q4 2026. The team uses 1Q27, its reading of the MD&A line.

Sources: Central Pattana, 2026g, pp. 2, 7; Central Pattana Investor Relations, 2026, p. 30; Cushman & Wakefield, 2026, pp. 1–2; Inside Retail Asia, 2026; Government Public Relations Department, 2026; Nation Thailand, 2026g, 2026l

Speaker note (backup slide, not presented)

Backup slide, not presented. SWOT and rivals are from the Section 2 text as corrected on 29 Oct 2026; the Threats figures match Table 6.6 in Chapter 6: China arrivals fell 33.55% in 2025 and rose 16.05% in January to August 2026 (year-on-year changes, not a fall from the pre-pandemic peak, for which the report has no figure), and household debt was 85.9% of GDP at Q1 2026. BCG and nine-box views are team assessments from the Week 6 appendix; Offices sit at Low x Low (bottom-right). The footnote lists the dates CPN and Cushman & Wakefield give for The Central Phaholyothin.

Back to outline

The proposed FY2027 ceilings total ฿2,760 million over 11 lines, 5.2% of FY2025 revenue, a team proposal and not CPN guidance.

2,760 THB million, lines 1 to 11

1,900 lines 1 to 3: flagship windows

860 lines 4 to 11: new and re-weighted

5.2% of FY2025 total revenue

[Proposed] FY2027 ceilings (THB million)

Line	Tactic	THB m	Objectives	Window
1	Great Chinese New Year with Central Retail	500	M3, F1	Q1
2	Summer Fest 2027 including Songkran	600	M1, M3	Q1–Q2
3	Year-end season including Countdown	800	M1, M3, F1	Q4
4	Gen Z content, fandom, creator and Pride programme	150	M1	Q2–Q4
5	Opening launches: The Orchard, The Central Phaholyothin, CenTRal cENtrAL	250	M1, F1	Q1–Q2
6	Tourist programme for India, Gulf and Europe	100	M2	Q2–Q4
7	CENTRAL X and The 1 O2O incentives	60	M3	Q1–Q4
8	The 1 BIZ tenant programme	200	M4	Q1–Q4
9	LEAD Year 9 and Thai-brand pop-ups	30	M1, M4	Q1–Q3
10	Sustainability storytelling	50	M5	Q2–Q4
11	Marketing research	20	M1–M5	Q1–Q4

[Proposed] Release rules (Section 6.1)

Lines 4, 6 and 7 (฿310 million) are released in two halves: ฿155 million at G0, ฿105 million (lines 4 and 7) at G1, and ฿50 million (line 6) at G2 if the registrant data support it. Line 5 (฿250 million) is released opening by opening, after CPN confirms the date.

Channels (Sections 4.3 and 4.4)

- CPN's own: Central Life X app, LINE account Central Life, CENTRAL X (Scan Receipt at 44 centres).
- CPN Serve is a tenant app; whether CENTRAL X replaced Central Life X is not established.
- [Proposed] CENTRAL X as the single app front door (D4), with Gen Z missions added (P7).
- The 1 Tourist counters at 14 centres; free welcome package, discounts up to 40%, which CPN may change.
- [Proposed] Gen Z media weighted to TikTok, YouTube and LINE; creator briefs tied to CENTRAL X registration.
- [Proposed] Tourist partners and a TAT Diwali event: Gulf from Q2, Europe from Q3, India from Q4 (D3, R5).
- [Proposed] Pilot enrolling Malaysian shoppers at Central i-City into The 1 Tourist in Q2 (D5).

[Proposed] FY2027 campaign calendar

Window	Programme	Objectives	2025–26 comparator
Jan–Feb	Great Chinese New Year with Central Retail	M3, F1	30 Jan–1 Mar 2026; ฿600 million, joint with Central Retail
Mar–May	Summer Fest 2027 with Songkran as a module; Gen Z stages	M1, M3	13 Mar–10 May 2026; ฿600 million
Jun	Pride For All with a disclosed creator network	M1	30 May–30 Jun 2026; no budget stated
Jul–Sep	LEAD Year 9 sandbox; State Your Style successor; first milestone report	M1, M4, M5	LEAD sandbox 20–26 Jul; State Your Style 3 Sep–4 Oct 2026
Oct–Nov	India programme with TAT; China Golden Week campaign	M2	Diwali and Golden Week campaign announced for Oct 2025
Nov–Dec	Year-end season with Countdown on 31 December 2027	M1, M3, F1	Magical Stars over ฿800 million (as reported); Countdown 2026 over ฿500 million
Rolling	Opening campaigns for three FY2027 openings; always-on creator content	M1, F1	Opening targets (Central Pattana, 2026e, 2026g)

Back to outline

In FY2027E the base case misses F1 (growth 6.6% against 7.0%; margin 34.6% against our 35.5% floor); only the optimistic case meets it.

Table 5.2: main assumptions (team)

ID	Assumption	Conservative	Base	Optimistic
B1	R&S growth, 2H26E y/y	5.0%	7.5%	9.0%
B2	R&S organic growth, FY2027E / FY2028E	4.0% / 4.0%	6.5% / 6.0%	8.0% / 7.5%
C1	M1 Gen Z visits (ages 18 to 29): share x frequency x yield	as base	25% x +10% x 50% = 1.25%	as base
C2	M2 international visits: share x uplift x yield	as base	13.7% x +4% x 100% = 0.55%	as base
C4	M4 The 1 BIZ stores: share x sales lift	as base	16.7% x +5% = 0.83%	as base
C5	Pass-through to CPN revenue	as base	50% (1.32% run-rate effect)	as base
C6	Delivery of the assumed programme gain	0.5x	1.0x	1.5x
D2	R&S cost ratio change, FY2027E / FY2028E (points)	+1.0 / +0.5	+0.5 / +0.0	-0.3 / -0.2
D4	SG&A growth, FY2027E / FY2028E	6.0% / 6.0%	5.0% / 5.0%	4.0% / 4.0%
D5	Net-new marketing, FY2027E and FY2028E	as base	฿560 million a year	as base
D6	Contribution margin for the break-even test	42.6%	60.0%	86.3%

How to read the assumptions

All are team assumptions. R&S is rental and services revenue. Two unsourced assumptions (rows C1 and C4) carry the case: M1 supplies 47% of the FY2028E uplift and M1 plus M4 supply 79%. Chapter 6 adopts the +10% and +5% as [Proposed] targets; they are set equal to the assumptions and are not evidence for them.

Scenario results, Tables 5.8 and 5.11 (team)

Scenario	Net profit FY27E (THB m)	Revenue growth FY27E / FY28E	Net margin FY27E / FY28E	Meets F1?
Conservative	18,473	+3.3% / +3.9%	32.8% / 32.0%	No
Base	20,430	+6.6% / +6.9%	34.6% / 34.8%	No
Optimistic	21,915	+8.7% / +9.0%	35.9% / 36.8%	Yes, by definition

Pass-through and sensitivities (team)

Test	Result	Reading
Pass-through assumed (row C5)	50%	Team assumption
FY2028E break-even pass-through, ฿240m tactics	29%	Team calculation
FY2028E break-even pass-through, all ฿560m	67%	Above the 50% assumed
Base uplift, FY2027E / FY2028E	฿328m / ฿696m	Base case
Base uplift if the 25% visit share were 14.7%	฿264m / ฿560m	Stand-in: ages 13–24 population share; FY2027E growth 0.1 point lower
Each ฿100m of marketing that earns no revenue	-0.14 points	Net margin
Each 10% fall in international visits	฿342m	Revenue lost, about

Reading the margin result

Our 35.5% floor is the team's calculation, 18,841 / 53,009 = 35.54%, rounded. It holds ฿2,119 million of after-tax one-off Rama 2 gains (3.2 points); on KPI K8's core test the base path is 33.9% against a [Proposed] core floor of 32.3%. Without the plan the base margin would be 35.2% in FY2027E, so the organic path already sits below the floor. Base-case FY2027E profit is ฿558 million short of it (rounded floor).

ID | Assumption | Conservative | Base | Optimistic
B1 | R&S growth, 2H26E y/y | 5.0% | 7.5% | 9.0%
B2 | R&S organic growth, FY2027E / FY2028E | 4.0% / 4.0% | 6.5% / 6.0% | 8.0% / 7.5%
C1 | M1 Gen Z visits (ages 18 to 29): share x frequency x yield | as base | 25% x +10% x 50% = 1.25% | as base
C2 | M2 international visits: share x uplift x yield | as base | 13.7% x +4% x 100% = 0.55% | as base
C4 | M4 The 1 BIZ stores: share x sales lift | as base | 16.7% x +5% = 0.83% | as base
C5 | Pass-through to CPN revenue | as base | 50% (1.32% run-rate effect) | as base
C6 | Delivery of the assumed programme gain | 0.5x | 1.0x | 1.5x
D2 | R&S cost ratio change, FY2027E / FY2028E (points) | +1.0 / +0.5 | +0.5 / +0.0 | -0.3 / -0.2
D4 | SG&A growth, FY2027E / FY2028E | 6.0% / 6.0% | 5.0% / 5.0% | 4.0% / 4.0%
D5 | Net-new marketing, FY2027E and FY2028E | as base | ฿560 million a year | as base
D6 | Contribution margin for the break-even test | 42.6% | 60.0% | 86.3%

Table 5.2: main assumptions (team): column widths
7% / 34% / 15% / 30% / 14% (maroon header, zebra rows, first column bold maroon)

How to read the assumptions
All are team assumptions. R&S is rental and services revenue. Two unsourced assumptions (rows C1 and C4) carry the case: M1 supplies 47% of the FY2028E uplift and M1 plus M4 supply 79%. Chapter 6 adopts the +10% and +5% as [Proposed] targets; they are set equal to the assumptions and are not evidence for them.

Scenario results, Tables 5.8 and 5.11 (team)
Scenario | Net profit FY27E (THB m) | Revenue growth FY27E / FY28E | Net margin FY27E / FY28E | Meets F1?
Conservative | 18,473 | +3.3% / +3.9% | 32.8% / 32.0% | No
Base | 20,430 | +6.6% / +6.9% | 34.6% / 34.8% | No
Optimistic | 21,915 | +8.7% / +9.0% | 35.9% / 36.8% | Yes, by definition

Scenario results, Tables 5.8 and 5.11 (team): column widths
17% / 17% / 24% / 22% / 20% (maroon header, zebra rows, first column bold maroon)

Pass-through and sensitivities (team)
Test | Result | Reading
Pass-through assumed (row C5) | 50% | Team assumption
FY2028E break-even pass-through, ฿240m tactics | 29% | Team calculation
FY2028E break-even pass-through, all ฿560m | 67% | Above the 50% assumed
Base uplift, FY2027E / FY2028E | ฿328m / ฿696m | Base case
Base uplift if the 25% visit share were 14.7% | ฿264m / ฿560m | Stand-in: ages 13–24 population share; FY2027E growth 0.1 point lower
Each ฿100m of marketing that earns no revenue | -0.14 points | Net margin
Each 10% fall in international visits | ฿342m | Revenue lost, about

Pass-through and sensitivities (team): column widths
46% / 22% / 32% (maroon header, zebra rows, first column bold maroon)

Reading the margin result
Our 35.5% floor is the team's calculation, 18,841 / 53,009 = 35.54%, rounded. It holds ฿2,119 million of after-tax one-off Rama 2 gains (3.2 points); on KPI K8's core test the base path is 33.9% against a [Proposed] core floor of 32.3%. Without the plan the base margin would be 35.2% in FY2027E, so the organic path already sits below the floor. Base-case FY2027E profit is ฿558 million short of it (rounded floor).

Reading the margin result

Back to outline

All ten risks in Table 6.6 have a likelihood, an impact, a numeric trigger and a response; four are rated High impact (risks 2, 6, 7 and 10).

Table 6.6: ten risks (team judgement)

Risk	Likelihood	Impact	Trigger (thresholds [Proposed])	Response
1. E-commerce and social-commerce share gain	High	Medium	Online share up over 2 points in a year; K4 not above Q1 baseline by Q3	Experience-led zones (P1); CENTRAL X as front door (D4)
2. Household debt and consumer slowdown	High	High	Debt over 88% of GDP; BoT 2027 growth under 1.5%; R&S growth 4.3% or less	Amber/Red ladder; capped vouchers (R4); CPN already delays some residential launches
3. Tourism volatility, China	High	Medium	Arrivals down over 8% year to date (down 4.12% to 17 Oct 2026)	Line 6 in tranches; mix toward India, the Gulf and Europe (M2)
4. Bangkok saturation and tenant bargaining power	Medium	Medium	Quarterly occupancy under 90% (K13); 91% in 2Q26	Renewal rule R1 (2–3% escalators, non-rent concessions first)
5. Overseas execution	Medium	Low	Intl. revenue under ฿720 million; Vietnam spend before a definitive agreement	No FY2027 Vietnam budget; Malaysia limited to the D5 pilot
6. PDPA and data privacy	Medium	High	Confirmed breach or leak; unreported in 72 hours; consent not live 31 Jan 2027	S1 set-up; aggregated extracts only; S4 survey ages 20+ only; count-only counters
7. Sustainability-claim exposure	Medium	High	Headroom to bond carbon path under 10% (18% in 2025); free space under 2.7%	Claims traced to CPN documents (K7); bond never said to fund the ฿110bn plan
8. Capex and execution overrun	High	Medium	Opening over a quarter late; finance cost over ฿4,149m; net debt/equity >0.60x	Launch spend follows CPN confirmation (D1); model rerun at every release
9. Dependence on one-off gains	High	Medium	Reported minus core net margin over 1.5 points (3.2 in FY2025)	F1 on reported and core margin (K8); no credit for FX gains or CPNREIT sublease
10. Gen Z disengagement (thesis risk)	Medium	High	Gen Z visits per active member under +5% at G3; Q4 gain under 3.1 points	Format zones (P1); creator briefs tied to CENTRAL X; move money to best format

Scales and terms

Likelihood: High above 50%, Medium 20% to 50%, Low below 20%. Impact: High if FY2027E net profit would move by more than 5% (฿1,022 million of ฿20,430 million) or an objective would be out of reach; Medium 1% to 5%; Low below 1%. These are team judgements. R&S is rental and services revenue; BoT is the Bank of Thailand.

Table 6.6: ten risks (team judgement)
Scales and terms

Back to outline

We answer the 13 likely questions plainly, with a suggested speaker for each: the base case misses F1 and the extra revenue is our assumption.

Plan and numbers

Q1 Why back a plan that misses F1 and does not repay? Spkr 6
A gated test. The no-plan path also misses F1 (6.0% growth, 35.2% margin). Only ฿240m of tactics repay; benefits after FY2028E are not valued.

Q2 Does the plan pay for itself? Spkr 4
No. On assumed uplift, ฿560m a year is not repaid by FY2028E (needs 67% pass-through). ฿240m of tactics repay in 1.2 years; ฿320m earns none.

Q3 Isn't our 35.5% floor inflated by one-offs? Is F1 missed on core? Spkr 5
Yes: FY2025 held ฿2,119m of Rama 2 one-offs (3.2 points). On the K8 core test, base 33.9% clears a 32.3% floor, but growth of 6.6% still misses 7.0%.

Q4 What evidence supports the extra revenue? Spkr 4
Not yet measured. Team assumptions (25% visit share for ages 18–29, +10% frequency, +5% lift) carry 79% of FY2028E uplift. The baseline and gates G2 to G4 test the frequency and lift; the 25% share is not measured directly, as K1 is the 20–29 share of visitors aged 20+.

Q5 How do you know ฿2,200m is already in costs? Spkr 1
We do not. CPN reports no separate marketing expense, so ฿2,200m is our assumption. Each ฿100m not in the base cuts FY2027E margin by 0.14 points.

Q6 How much of the money really depends on results? Spkr 5
45% of net-new (฿250m of ฿560m) waits for a results test, at G2 or G3. G0 and G1 test readiness; ฿310m (55%) is due by 30 Jun.

Q7 What stops a loss-making FY2028 repeat? Spkr 5
G4 requires ฿400m uplift and pass-through above 29% (tactics break-even); a miss limits FY2028 to tactics that passed. The full ฿560m needs ฿933m and 67%: reviewed, not required.

Sustainability, data and definitions

Q8 What is the ESG index called, and is FTSE4Good confirmed? Spkr 2
The Dow Jones Best-in-Class Indices (formerly DJSI): World 8 years, Emerging Markets 12, per CPN, 9 Apr 2026. FTSE4Good: per CPN, unconfirmed.

Q9 Which emissions target do you quote? Spkr 6
One only: a 50% cut in emissions intensity by 2034 against a 2024 base, the target in CPN's latest (2025) climate summary.

Q10 How many members does The 1 have? Spkr 2
Central Retail's loyalty ecosystem: 23 million members in Thailand (press release, 14 Aug 2026). It does not name the programme; we read it as The 1.

Q11 Where does the 1Q27 date for The Central Phaholyothin come from? Spkr 3
CPN's 2Q26 MD&A (p. 7) lists "The Central" at 1Q27, which we read as The Central Phaholyothin. Spend waits for a CPN filing (D1); other dates on B2.

Q12 Which net margin is right: 35.5% or 33.1%? Spkr 5
35.5% is our calculation (18,841 / 53,009). CPN publishes 33.1% (IR page), about 35.6% (MD&A) and 36% (One Report). We never call 35.5% CPN's figure.

Q13 How is Gen Z defined, and what consent age? Spkr 4
Ages 18–29 (team definition). The survey reaches only people aged 20+ (age of majority; younger people would need a guardian on our reading of PDPA s.20), so it measures 20–29; member data cover active members 18–29. DataReportal's 13–24 is a different band.

B6 Q&A cards

Backup · Likely questions · NEW

Speaker note (backup slide, not presented)

Owners are suggested and can be swapped. Q1 (Spkr 6): It is a gated test, and the no-plan path also misses F1. Q2 (Spkr 4): No. On assumed uplift, the full 560 million a year is not repaid by FY2028E. Q3 (Spkr 5): Yes, our floor holds FY2025 one-offs; on the core test the margin passes, but growth still misses 7.0 percent. Q4 (Spkr 4): Not yet measured; our volume assumptions carry most of the uplift, and the baseline and gates test the frequency and lift; the 25% share is not measured directly, because K1 is the 20 to 29 share of visitors aged 20 and over. Q5 (Spkr 1): We do not know; CPN reports no separate marketing expense, so the 2,200 million is our assumption. Q6 (Spkr 5): 45 percent of the net-new money waits for a results test, at gate two or three; gates zero and one test readiness. Q7 (Spkr 5): G4 requires the tactics break-even, 400 million of uplift and pass-through above 29 percent; below that FY2028 is limited to the tactics that passed. The full 560 million needs 933 million and 67 percent, which G4 reviews but does not require. Q8 (Spkr 2): It is the Dow Jones Best-in-Class Indices, formerly DJSI, per CPN (9 Apr 2026); S&P's Sustainability Yearbook 2026 (S&P-sourced) lists CPN in the top 10% of CSA scores. Q9 (Spkr 6): We quote only the 50% cut in emissions intensity by 2034 against 2024. Q10 (Spkr 2): Central Retail's loyalty ecosystem has 23 million members in Thailand (Central Retail press release, 14 Aug 2026), which we read as The 1. Q11 (Spkr 3): The 1Q27 date comes from the 2Q26 MD&A, p. 7; launch spend follows a CPN filing (D1). Q12 (Spkr 5): 35.5% is our own calculation from CPN's two reported figures. Q13 (Spkr 4): Gen Z and young adults are ages 18 to 29; our survey reaches only respondents aged 20 and over, the age of majority, so it measures 20 to 29, and member data cover active members 18 to 29; younger respondents would need a guardian under the PDPA, which a Thai-law reader should confirm.
